Product Change Notification

Product	S7 TrackPro X
Product codes	S7100 S7300 S7400
Ordering No. changes	No
New ordering code	-
Serial number range	Since S700010917

Reason for changes

Quality improvements

Changes

Hardware changes	The redesign of the hardware platform contains the following changes:
	• Replace GNSS module with uBlox NEO-M8 module
	• Replace WLAN module with uBlox EMMY-W1 module
	  ↘ dual band WLAN
	  ↘ Bluetooth LE / Bluetooth classic
	• Low power unit for handling ignition signal

Software changes	Board Support Package (BSP) is now based on the Yocto Project. The following versions are used: • Yocto Project: Krogoth (2.1) • Linux Kernel 4.4 • RPM based on Package Management
